

Sherman M4A3E4

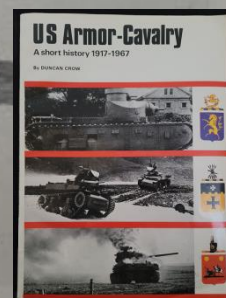

75mm turret
with 76mm gun

Willy De Cock

Bron :

Newly modified at the Tokyo Ordnance Center in September 1950 this Sherman M4A3 was one of many which had its 75-mm M3 gun replaced by a 76-mm gun for use in Korea. The original turret was retained and the recoil guard of the 76 was modified to let it fit in.
